

## CONSULTiom has partnered with EPM Live

[CONSULTiom](#) strives to keep abreast of the latest technology trends and continually replenishes its core competencies to align with its customers business needs. For that and as part of its expansion strategy within the Project Management services, CONSULTiom has partnered with EPM Live; a leading provider of project and work management solutions built on the Microsoft SharePoint platform. With this partnership, CONSULTiom can now offer its clients in the Middle East the most cost effective, low risk, comprehensive, and convenient Enterprise Project Management solutions and services in the market.

"We are excited with this partnership and new offering. As the economy continues to change, the need to cut cost and reduce time-to-market continues to grow as well. This is what EPM is all about." said Mr. Jehad Abu Baker, CEO of CONSULTiom Group.

The Microsoft Office EPM Solution includes the following products from the Microsoft Office Project 2007 family to provide organizations with an end-to-end project portfolio management (PPM) solution: Microsoft Office Project Professional 2007, Microsoft Office Project Server 2007, and Microsoft Office Project Portfolio Server 2007.

According to a 2008 IDC study, organizations had huge cost savings when they implemented a PPM solution:

- Cost per project fell by 37%
- Redundant projects dropped by 78%
- Project failure rates decreased by 59%
- Time-to-market for revenue generating initiatives dropped by 33%
